## SUMMARY

Engineering Program Manager Intern at Apple and former Technical Product Manager at OLA Electric with 3+ years of experience delivering large-scale software solutions impacting 1M+ users. Currently driving cross-functional execution of 15+ projects at Apple and building AI-powered tools to improve operational efficiency. Seeking Fall 2026 internship opportunities.

## EDUCATION

**Purdue University** West Lafayette, IN  
**Master of Engineering Management** – GPA: 3.86 May 2027

- **Specialization:** Project Management, Technical Product Management.
- **Project Manager, Purdue Data Mine:** Drove development of a hydrogen infrastructure decision-support platform impacting 5,000+ freight truck trips by managing scope, milestones, and cross-functional execution.

**Birla Institute of Technology and Science, Pilani (Top 10 in India)** Pilani, India  
**Bachelor of Engineering in Electronics and Instrumentation** May 2022

## WORK EXPERIENCE

**Apple – Engineering Program Manager Intern** May 2026 – Present, Cupertino, CA

- Drive execution of 15+ live Pricing Platform projects, aligning 30+ cross-functional stakeholders to define LOE, manage dependencies, mitigate risks, and deliver projects through development, validation, and production milestones.
- Maintain integrated program dashboards and Kanban boards spanning 70+ active work items, providing leadership visibility into project health, delivery risks, dependencies, and execution progress across the Pricing Platform portfolio.
- Engineer AI agents, MCP servers, and workflow automation tools using Claude Code to augment project management tasks, reduce manual overhead, and enable scalable adoption across teams.

**OLA Electric – Assistant Manager** Jul 2022 - Jun 2025  
*India's leading electric two-wheeler manufacturer, driving the shift toward sustainable and clean mobility.* Bengaluru, India

### **Anti-lock Braking System (ABS) – Technical Product Manager**

- Saved \$2.8M in vendor costs by developing an in-house Anti-lock Braking System, leading a 5-member team, and collaborating across 6 business and technical verticals to define product strategy and requirements.
- Identified rider pain points with ABS performance on low-friction surfaces through interviews and usability testing, and prioritized corresponding improvements in the PRD, boosting ride safety and increasing overall vehicle NPS by 8 points.
- Achieved 99.2% reliability for the product by interpreting failure data and directing validation focus on critical risk scenarios.

### **EV Charger – Software Project Lead**

- Delivered controls software for 22K+ EV chargers, reducing the project cycle time by 12% and completing the development 8.4% under budget by mitigating risks, streamlining workflows across engineering and QA, and optimizing resources.
- Reduced post-release fixes by 34% by establishing a CI/CD pipeline for early defect detection, conducting thorough root cause analyses, and ensuring alignment between teams through bi-weekly sprint sync-ups.
- Applied buffer management, resource leveling, and critical task prioritization, reducing resource-conflict delays by 20%.

### **Vehicle OS – Software Model Developer (Recognized with Outstanding New Hire Award)**

- Implemented key features for MOVE OS 3 by developing models on Simulink that achieved 88% adoption across 1M customers.
- Designed analytics dashboards on Vector and JIRA for project tracking of 100+ metrics and KPIs, providing actionable insights that resolved all critical software issues, reduced customer complaints by 30%, and saved \$100,000 in support costs.

## PROJECTS

**NextLeap – Product Manager Fellow** Jun 2025 - Aug 2025

- Discovered \$7M+ potential annual cost savings in the quick-commerce segment by recommending a strategic shift from instant to scheduled delivery, supported by comprehensive market research, competitor benchmarking, and secondary research.
- Identified key adoption barriers through 100+ user interviews and proposed loyalty incentives and expanded delivery slots, projecting a 26% increase in scheduled delivery adoption and a 16% rise in repeat orders.

## SKILLS

- **Program Management:** Agile, Scrum, Kanban, Program Planning, Project Scheduling, Roadmapping, Risk Management, JIRA, Dependency Management, Cross-Functional Leadership, Resource Planning, Process Improvement, Confluence, MS Project.
- **Product Management:** A/B Tests, Root Cause Analysis, UI/UX Design, Product Lifecycle Management, API Integration, Market Analysis, Competitive Benchmarking, Product Roadmap Planning, User Segmentation, Customer Journey Mapping.
- **Technical:** Claude Code, Agentic-AI, Generative-AI, Microsoft Tools(Excel, PowerPoint, Word), Power BI, Tableau, C++, Python.
